Vineet Sharma

Senior Full Stack Developer | React | Next.js | Node.js | TypeScript

Phone: +91 9958103262 | **Email**: vineetsharma2030@gmail.com | **LinkedIn**: linkedin.com/in/vineet-sharma | **GitHub**: github.com/Vineetsharma3262 | **Portfolio**: vineetsharma-portfolio.vercel.app

Professional Summary

Senior Full Stack Developer with 5+ years of experience designing and building scalable web applications using React, Next.js, Node.js, and TypeScript. Strong background in frontend architecture, API development, real-time systems, and performance optimization. Experienced in developing enterprise dashboards, AI-driven applications, and cloud-based platforms with modern DevOps practices. Proven ability to improve application performance, build reusable component systems, and collaborate across product, design, and backend teams to deliver high-quality software solutions.

Key Achievements

- Improved application performance by 35% through frontend optimization and code splitting
- Built real-time streaming UI using WebSockets/SSE for AI-driven analytics dashboards
- Developed reusable component libraries reducing development effort by ~40%

Technical Skills

Frontend: React.js, Next.js, TypeScript, Redux Toolkit, React Query, Tailwind CSS, Material UI, SCSS

Backend: Node.js, Express.js, REST APIs, GraphQL, Microservices Architecture

Databases: MongoDB, PostgreSQL, MySQL

Realtime Systems: WebSockets, Server-Sent Events (SSE)

Testing: Jest, React Testing Library, Cypress

DevOps & Cloud: AWS, CI/CD Pipelines, CodePipeline, Docker (basic)

Tools: Git, Jira, Postman, Swagger, Figma

Professional Experience

Senior Software Engineer – FiftyFive Technologies Pvt Ltd

Dec 2023 – Present

- Leading full-stack development of enterprise platforms including AI-powered analytics and real-time log monitoring systems.
- Built scalable frontend architecture using React, Next.js, and TypeScript improving performance by 35%.
- Designed modular frontend architecture and scalable API integrations supporting enterprise-scale real-time analytics dashboards.

- Designed and developed scalable REST APIs using Node.js and Express supporting high-volume real-time analytics and reducing API response time by ~25%.
- Implemented WebSocket and SSE-based streaming interfaces for live dashboards and AI responses.
- Designed reusable UI components and modules improving development efficiency across teams.
- Implemented CI/CD pipelines using AWS CodePipeline enabling automated deployments and zero-downtime releases.
- Mentored junior developers and conducted code reviews to maintain engineering standards.

Software Engineer – Itoby Infotech Pvt Ltd

Aug 2020 – Dec 2023

- Developed enterprise web applications for banking, healthcare, and analytics platforms.
- Built scalable dashboards and data visualization systems using React, Redux, and charting libraries.
- Implemented REST APIs and integrated backend services for secure and efficient data flow.
- Improved application performance and accessibility using Lighthouse optimization and WCAG standards.
- Automated testing pipelines using Cypress and improved release stability.

Key Projects

Q-Brain – AI Analytics Platform

- Developed a conversational AI web application enabling natural language queries on enterprise data.
- Implemented real-time response streaming using WebSockets/SSE.
- Built interactive dashboards and visualization modules for executive insights.
- Developed export and sharing features for AI-generated reports.

Scaleflow – Real-time Cloud Infrastructure Scaling Platform

- Built real-time monitoring dashboards for storage and infrastructure analytics.
- Developed scalable UI modules using React and Redux improving performance scores significantly.
- Integrated backend APIs and live updates for automated resource scaling insights.

LogEasy – AI-Powered Log Analytics & Monitoring Platform

- Developed AI-assisted log analysis dashboards for system monitoring.
- Implemented optimized API handling and state management improving response speed.
- Built visualization tools for anomaly detection and log pattern analysis.

Professional Strengths

Full Stack Architecture | Performance Optimization | Scalable UI Systems | API Design | Agile Development | Mentorship | Cross-team Collaboration

Education

Master of Computer Applications (MCA) – IGNOU (Ongoing)
Bachelor of Computer Applications (BCA) – IGNOU
